

LEGEND

RAC MRLs: Raw Agricultural Commodity Maximum Residue Levels (or Limits)

Processed MRLs: Other MRLs relevant to the search query such as those set on processed food products.

The "Market" column indicates the country for which the MRL information is applicable.

The "Origin Market" column indicates the source of the MRL for countries which defer to other markets' MRL

The "Active Ingredient" column lists the pesticide chemical substance. These terms should not be considered residue

The "Published Commodity" column indicates the commodity term as published in the regulation on which the MRL is set. When a published commodity term is not listed this indicates that the MRL is a default tolerance.

The "Index Commodity" column indicates the BCI Global Crop Dictionary term that was included in the search query and for which the MRL regulation is applicable.

The "MRL (ppm)" column lists the numeric value of the MRL in parts per million (ppm). The word "Exempt" will be listed to indicate that an MRL is not required for the active ingredient use on the relevant published commodity.

The "MRL Type" column includes:

General - a general MRL.

"Default" indicates that the MRL value displayed is a default tolerance. Some markets defer to a default MRL value when a specific MRL has not been established for a commodity and active ingredient. Policies regarding the use of default MRLs vary by country. The following are markets which apply a default MRL:

Argentina: 0.01 ppm | Canada: 0.1 ppm | European Economic Area: 0.01 ppm | European Union: 0.01 ppm | Egypt: 0.01 ppm |

Japan: 0.01 ppm | Malaysia: 0.01 ppm | Morocco: 0.01 ppm | New Zealand: 0.1 ppm | South Africa: 0.01 ppm | Turkey: 0.01 ppm

Regional, Section 18, or Time-Limited Tolerance - These are US specific types of MRLs that may have expiration dates listed.

Pending - MRL has been officially established but is not yet in effect

The "Expiry Date" column lists the expiration date for an MRL if a revocation has been officially indicated in the MRL regulations. When the field lists "Proposed Revocation" the MRL has been proposed to be revoked in a draft proposal, amendment, or petition that is in the regulatory process. These proposed actions are subject to change or withdrawal.

The "Effective Date" column indicates the in force date of the relevant MRL regulation. For Pending MRLs this is the future date on which the MRLs will enter into force.

The "US Import Tolerance" column indicates that in the US Code of Federal Regulations (CFRs), the tolerance was noted specifically as an import tolerance established for imported product into the US, or was noted as having no current

The "US CFR Prescribed Use" indicates a US tolerances for which registered use and application information are prescribed in the US CFR in addition to the residue level. These tolerances are typically established for uses such as food or feed handling and processing facility treatments; mosquito adulticide applications; preharvest treatment of pest burrows; area fly and mosquito control; and other special situations. Please read carefully the information provided in the User Guide, and FAQs about US FDA enforcement of these US tolerances.

The "Undefined Published Commodity" column indicates if the Published Commodity term is not clearly defined by the country in its regulations. In these cases the Global Crop Dictionary term (index commodity) is assumed to be relevant based on the Codex Alimentarius Classification of Foods and Animal Feeds" but should be confirmed with official

The "Commodity Notes" column includes any additional regulatory information relevant to the MRL.

The "LOD" column indicates that the MRL is set at the Limit of Determination.

The "LOQ" column indicates that the MRL is set at the Limit of Quantification.

The "Seed Treatment" column indicates if the MRL is set for seed treatment use.

The "Post Harvest" column indicates if the MRL is set for post harvest.

The "Residue Definition" column lists the exact active ingredient term cited in a market's regulation along with any residue definition information provided.

The "Regulation Name" column indicates the name of the MRL regulation for MRLs currently in effect (in force) or that

The "Source Document Name" column indicates the name of the document announcing the draft MRL proposal,

The "Publication Date" column lists the date when the source document announcing the draft MRL proposal, amendment, or petition was published.

The "Comments Due Date" column indicates when comments on MRL proposals are due to the regulatory authority considering proposed MRL revisions. If comments are solicited, this date is obtained from the Source Document.

REPORT CONTENTS

This report was generated on January 26, 2016.

Commodities: Honey

Markets: Argentina; Australia; Austria; Belgium; Bulgaria; Canada; Croatia; Cyprus; Czech Republic; Denmark; Dominican Republic; Egypt; Estonia; European Economic Area; European Union; Finland; France; French West Indies; Germany; Greece; Honduras; Hungary; Iceland; Ireland; Italy; Japan; Latvia; Lithuania; Luxembourg; Malaysia; Malta; Mexico; Morocco; Netherlands; New Zealand; Norway; Poland; Portugal; Romania; Slovakia; Slovenia; South Africa; Spain; Sweden; Switzerland; Turkey; United Arab Emirates; United Kingdom; United States

Pesticides: Boscalid; Cadusafos; Coumaphos; Fipronil; Imidacloprid; Pyrethrins; Tau-fluvalinate

Report Options: Order results by Commodity.
